

High Speed, Process Color

With the full implementation of our Heidelberg 5 color press, State Printing has one of the fastest sheet-fed presses available, printing up to 15,000 sheets per hour. This machine is ideal for process color printing such as brochures, annual reports, newsletters, magazines, posters (up to 20" x 28"), pocket folders, direct mail pieces, print inserts and many other full color, print applications. This press can print using process colors, custom mixed inks, metallic inks and spot varnish. These added capabilities help State Printing continue to be the full service printing solution for our government customers.

This photo shows our Heidelberg Speedmaster 74, 5 color press in action.
